

Standard Series MATCH RODS
CTM 12, 13 and 14.

The Standard Series CTM match rods offer match fishermen a superb match rod in a choice of 3 lengths to suit his particular preference. The unique method of construction keeps the weight down to an absolute minimum so they can all be fished for long periods without fatigue.

Sections: 3; Rings: High stand off; Butt and tip: Hard ceramic. Ferrules: Spigot. Lengths 12', 13' and 14'.

Fast Tip Series MATCH RODS
CTM 12A, 13A and 14A

The Fast Tip Series CTM Match Rods are similar in concept to the Standard Series, but are designed to give a slightly stiffer tip action for fishermen who prefer the extra speed when striking.

Despite their extra stiffness, they are all incredibly light for their length.
Sections: 3; Rings: High stand off; Butt and tip: Hard ceramic. Ferrules: Spigot. Lengths: 12', 13' and 14'.

Ultra-Fast Tip Series MATCH ROD
CTM 13 AA. (13' length only)

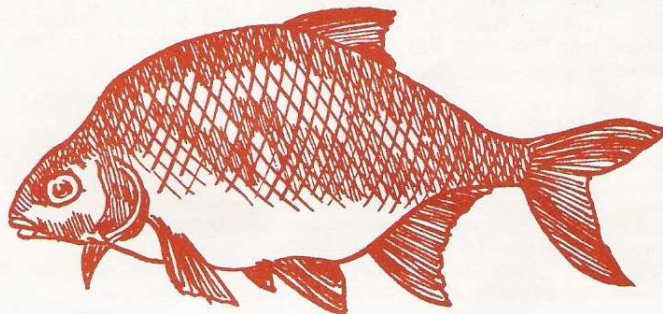

This rod has been designed for the angler who likes an exceptionally stiff tip action, and we believe it is as fast as anyone could possibly want. However, its fast action in no way detracts from its ability to play and handle good-sized fish.

Sections: 3; Rings: High stand off; Butt and tip: Hard ceramic. Ferrules: Spigot. Length 13'.

Special Fast Tip Series MATCH ROD
CTM 13 S (13' length only)

From time to time we have received requests for a 13' match rod with an action mid-way between the 13 A and the 13 AA, and because we manufacture our own blanks, we have been able to provide one - the 13 S. The addition of this rod to our range means that, in the 13' length, we can now offer a choice of 4 quite different tip actions, and you will be able to find one from our range to suit you, whatever your style.

Sections: 3; Rings: High stand off; Butt and tip: Hard ceramic. Ferrules: Spigot. Length: 13'.

Swing Tip Series LEDGER ROD
CTM 9

With the introduction of this new rod to our range, you can enjoy the same benefits of compound taper construction as in our normal match rods. Designed as a fishing rod, not just a "bite-detector", it combines lightness, sensitivity and strength. As much at home with a quiver-tip, it is powerful enough to cope with the heaviest fish, yet sensitive enough to give pleasure with small "match-winners". Will cover lines 3-6 and cope with block end and traditional swim-feeders.

Sections: 2; Rings: Butt: Hard ceramic; Tip: Hard ceramic with provisions for attaching swing tip; intermediate; High stand off. Ferrules: Spigot. Length: 9' 3".
